RESEARCH INTERESTS

My primary field of research is applied microeconomics, with an emphasis on labor economics and family studies. I am interested in demographic studies, economics of aging, and health economics.

RESEARCH

- **“Children or Work? The Impact of Fertility on Old-age Labour Supply”** with Yi Zhang (*World Development*, 2024) [[Link](#)].
Q: Does having more children or more male descendants, potentially as old-age security, save elder parents from “working until you drop”?
- **“Declining Fertility, Human Capital Investment, and Economic Sustainability”** with Mikko Myrskylä, Julia Hellstrand, Sampo Lappo, Angelo Lorenti, Jessica Nisen, and Heikki Tikanmäki (*R&R at Demography*) [[Link](#)].
Q: To what extent could investments in human capital offset the adverse economic impact of low fertility on pension sustainability?
- **“Should I Stay or Should I Go? Intergenerational Transfers and Residential Choice: Evidence from China”** with Max Groneck and Rob Alessie (Submitted at JoEA) [[Link](#)].
Q: Do different kinds of early-life transfers received from parents influence the location decision of the child and, hence, the differential caregiving at older ages?
- **“Trapped by Good Years – The Economic Impact of Weather Shocks”** with Xiaobing Wang and Guochang Zhao.
Q: How do rural families fare economically under weather risks with migration responses? Is good weather necessarily a good thing for the total household income?
- **“Comprehensive school reform and fertility consequences”** with Julia Hellstrand and Mikko Myrskylä
Q: Could education policy unexpectedly lead to fertility consequences?
